

EDGE PRO

COMMERCIAL AND INDUSTRIAL ROOF EDGE PROTECTION

RELIABLE | CONVENIENT | COST-EFFECTIVE

Get the edge on safety

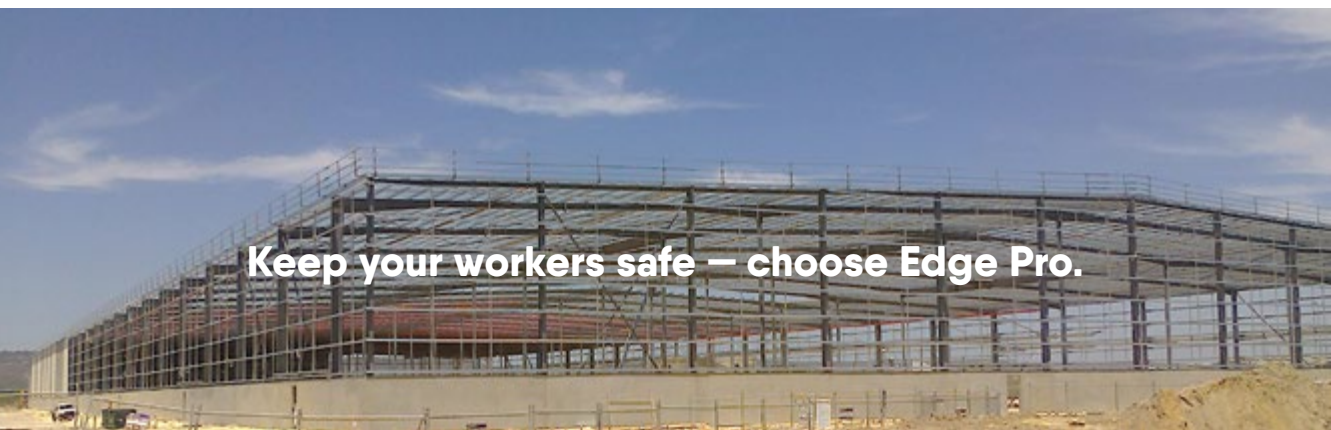

EDGE PRO – RELIABLE | CONVENIENT | COST-EFFECTIVE

Edge Pro is a leading supplier of edge protection for construction companies in and around the Perth metropolitan area and across Western Australia.

Edge Pro has been addressing critical height safety issues on commercial roofing sites by providing smart commercial edge protection solutions for over 15 years. Owner Ian McLachlan worked in the roofing industry for 20 years before starting Edge Pro and thoroughly understands the intricacies involved in the industry.

This experience, along with a dedicated support team, gives Edge Pro the 'edge' in providing tailored products to make clients' lives easier. All Edge Pro's products adhere to the relevant Australian Standards (AS1657-2013) relating to the design, construction and installation of fixed platforms, walkways, stairways and ladders.

Ian's ability to think about the end-user experience means Edge Pro's products go that step further while maintaining meticulous attention to detail.

Keep your workers safe – choose Edge Pro.

Fast, efficient and cost effective – the Edge Pro advantage.

PRODUCTS AND SERVICES

Edge Pro delivers customised commercial edge protection solutions to suit your particular requirements. We install and remove a range of outstanding temporary edge protection solutions with a fast turnaround time.

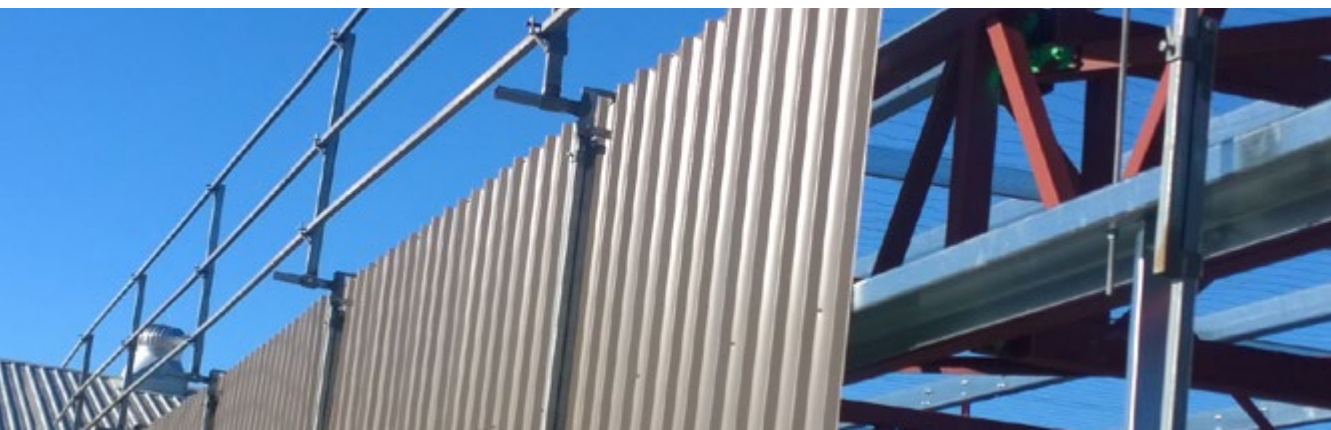

All our equipment can be configured to meet your needs. Our qualified team will assess your edge protection needs and tailor a solution to suit. We provide fittings to accommodate all variations on eaves, gable and parapet concrete walls and specialise in standard C and Z purlin and tip-up panel construction methods.

Our wall-cladding eaves and gable brackets are unique to Edge Pro. These fixtures allow roofers to simultaneously roof and clad or to switch between cladding and roofing according to conditions without having to remove the edge protection first.

This results in a smooth workflow, without any costly downtime and helps with flexible scheduling and building efficiencies.

When you choose Edge Pro, you know you're getting the very best equipment on the market. Our edge protection systems are made of galvanised steel, engineer-certified and rigorously tested to ensure they comply with the highest safety standards.

We also understand the nature of the construction industry and know things don't always go according to a planned timeframe, which is why we're flexible and able to accommodate clients' changing requirements.

WHY CHOOSE EDGE PRO?

At Edge Pro, we dedicate our time and service to ensuring the product meets your requirements.

You can count on us for:

- unique solutions to construction site issues, such as our eaves and gable brackets, which allow for work to continue uninterrupted;
- quality products without compromise;
- products that meet the relevant Australian Standards (AS1657-2013) relating to the design, construction and installation of fixed platforms, walkways, stairways and ladders;
- exceptional service – you'll be paired with an account manager who'll ensure you're getting the product and service you require;
- unrivaled flexibility to work with your schedule;
- fast turnaround time for installation and removal of the edge protection;
- experienced and knowledgeable staff;
- cost-effective solutions; and
- customised edge protection solutions that meet your needs.
